

DAVID KLUSOCZKI

SCRUM MASTER / BUSINESS ANALYST

PROFILE

If I were in charge I would teach Scrum Mastery for each and every leader, boss and politician. Leading without power is something you cannot buy, but earn and learn. I was always and hopefully ever will be an open person who stretches his own, and other's goals. As profession I chose to discover other's true potential, to see how high they can fly, in my free time as a hobby I do skydiving, to ensure we're landing safely. Besides that, I do understand most IT problems as I was into the requirement engineering as a Business Analyst, a full stack developer, a sys. Admin, and white hat hacker.

COVER LETTER

HEY THERE!

I had a key moment in my life in 2008: When 2 of us bought a Server. By running one of the biggest (mostly) Hungarian gaming community, I started to learn IT. Way back than C, C++, PHP, the task was given: what was requested by the community.

That one server and C++ experimenting led me into: a running business of hosting servers, to the ASC Asian High-Performance-Computing challenge finals, the hacking experiences led me to an offer from the hacking division of the Hungarian National Security Office, and several DevOps related contract works, including Jenkins, Azure DevOps, etc. But as it turned out I like to keep up with these technologies, but it's more like a hobby for now.

The real profession I'd like to pursue is working with people, dealing with high level organizational tasks, managing a project. A key is the scrum mastery where you learn how to lead without power, adding methods and framework to the work is just extending the possibility of growth.

For enterprise level project scopes if needed I can arrange other Scrum Master, Business Analyst, Project Lead candidates, who are just as qualified as I do, and on a scaled project stream already proved their work. Of course, as the agile frameworks we tend to use, I'm also agile on the terms of contract and business needs.

My hobbies indicates that I like the challenges, seeking stability, high stakes and performance, and the references represents that I can do the same on the field of business as well.

Looking forward to work out together you're vision project.

YOURS SINCERELY

DAVID KLUSOCZKI

ISTVAN GERLICZKY

Site Manager / Carl Zeiss Hungary

Phone : +36 20 519 9154

Email : istvan.gerliczky@zeiss.com

We think of David as a multifunctional member of the team, from IT problems to management topics, worked here as a Scrum Master and Business Analyst for most of the time.

FERENC BARANYAI

Chief SM / Carl Zeiss Hungary

Phone : +36 30 974 7197

Email : Ferenc.baranyai@zeiss.com

It was great to have David here, we founded the principals for 12 scrum teams to implement SaFE, and we coordinated the overarching topics of that product stream..

PETER FOLDI

Head of IT / Sanofi
